

THROUGH EXISTING HOLE WIDMER INLINE FACIAL ACCESS UNIT

LOW COST

- USES EXISTING DOOR HOLES
- NO EXTERNAL WIRING NEEDED

The Widmer Inline Facial Recognition Access Unit is a self-contained door access unit. The unit is powered by 8 AA batteries, and no additional electrical wiring is necessary.

Verification can be done by face recognition, proximity card, access PIN, or any combination of the three. Once a person is successfully verified, the door is unlocked. After 5 seconds, the door automatically locks again.
